1220 SPRING GARDEN ST.
PHILADELPHIA, PENNA.

1877 Maule's Golden Anniversary 1927

When we made an announcement in our spring catalog that we were celebrating our 50th anniversary as seedsmen, we did not expect to receive so many letters of congratulation, letters of praise for Maule Seeds, letters of continued success, etc.

We have simply been deluged with such letters from our customers from every part of the world. We take this opportunity to thank each and everyone who wrote us and assure you that we will put greater effort than ever before into the growing, proving and testing of our seeds, bulbs and roots so that the name **"Maule"** will always stand for quality, promptness and reliability.

Our old customers know that we have always supplied, at a reasonable price, **the best that can be had.**

To those who receive this book for the first time, let us assure you we will appreciate your order, regardless of its size. Whether you wish one packet of seed, one root or bulb, or a thousand, you certainly want the best, or you cannot expect satisfactory results. You get the benefit of our 50 years' experience. We have done the experimenting for you; you run no risk. A trial order will convince you.

To show our appreciation for our customers' orders in the past, and to make thousands of new friends, we have made our prices of Tulip bulbs particularly the Darwins, extremely low,—lower than they have ever been offered before.

Here is your opportunity to increase your planting of these lovely spring flowers. Buy a plentiful supply this year; they may never be sold as cheaply again. If you have never experienced the joy of having a bed or border of these Tulips about your home; take advantage of our low Golden Anniversary prices and plant Maule bulbs this fall.

We are confident you cannot purchase better quality bulbs anywhere. The majority of those herein offered are grown in Holland, and it is from the **best growers only** that we procure our stocks, which usually reach us in September. Just as soon after their arrival as we can unpack, assort and examine them, we will fill all orders in rotation as received.

REMEMBER!

All bulbs, listed in this catalog, **must be planted in the fall for** winter blooming indoors or spring flowering outdoors. Don't wait until planting time to send us your order; we may not be able to fill it then. **Avoid disappointment, place your order as soon as possible after receiving this book.**

Maule's Giant Pansies

(Heartsease) **Hardy Biennial**

For many years, in fact ever since we have been in business, we have given particular attention to Pansy seeds, until we really think our strains of Pansies are as good as can be found anywhere in the world. Pansies demand good soil, thriving best in a cool, moist but well drained position. Do not plant Pansies in the shade of a tree or building, as this causes straggly plants.

For early spring blooming, sow seeds in July, August or early September in the open ground or cold frame. They are quite hardy, but we recommend giving them a slight protection with straw or coarse litter during the winter. We know that the results obtained from our Pansy seeds have been so remarkable that this is the reason the demand for this beautiful and popular flower increases with us so much every year.

1614 Pansy, Maule's Prize Mixed Giant

1614 Maule's Prize Mixed Giant Pansies

A carefully prepared mixture of all the richest, handsomest and largest Pansies known, in a full range of colors. Look for blossoms 2½ to 3½ inches across, of perfect texture, embracing an endless variety of colors. Year by year we watch the production of American and European specialists and secure everything truly meritorious for incorporation into our Prize Mixture.

Pansy seed is a very high priced commodity, and it is next to impossible for the average flower lover to buy all the new sorts on the market. All the types that are really desirable will be found in Maule's Prize Mixture, which is largely grown for exhibition.
